

Brain **VGS** Vertical Gravity Oil Water Separator

Gravity Oil Separators

If your reading this then you will understand that separating your oil and water can turn a waste disposal cost into a positive self-funding operation.

The Brain **VGS** (Vertical Gravity Separator) is a compact, cost effective unit developed to separate non-emulsified oil and water .

Simple to install operate and maintain a VGS can achieve the necessary water quality for discharge to water authority standards, while oil and low density waste solids can be profitably reclaimed or recycled

Why pay for the removal of tons of oily water when you can separate the oil and reduce your disposal cost ?

Height : 1m or 2m
Diameter : 1.2m
Weight : From 30kgs or 60 kgs
Material : Stainless Steel 316
Process Capacity : up to 5m³ / hr

Superior design.

- Portable
- Cost effective effluent treatment.
- Produces clean water and reclaimed oil.
- Removes potentially hazardous vapor's.
- Reduces the risk of high pollution penalties.
