

Introducing Brain Associates Ltd

Incorporated in 1996, Brain Associates Ltd provides a range of industrial services that combines technical skills and experience gained through years of Industrial Services Contracting with in-house developed Effluent Treatment and Solid Waste Treatment equipment. We pride ourselves on actively seeking-out projects that others decline, using this combination of proven experience and innovative technologies. We provide our clients with Best Value by simplifying project requirements and providing affordable (often self-financing) solutions.

The following information outlines our services and accreditation.

We are currently implementing the following Management Systems and will have them in place by June 2015

- **ISO 9001**
- **ISO 14001**
- **OHAS 18001**
- **Registered Waste Carriers & Brokers (Environment Agency Registration No. CB/KM3545ZH)**

Utilising strategic partnership's with the country's largest waste management organisations, we can provide total waste and incident management solutions for our clients; from incident response through second-stage contracting to waste disposal and the design and installation of long-term waste handling and treatment solutions.

Please find detailed below a sample list of past clients and services we provide:

Our Clients

- Centrica
- Welsh Water, Thames Water
- Tata Steel
- BNFL
- BP, Shell, World Fuels Corporation
- Department For International Development
- Environment Agency
- Atkins Global
- UK Port Authorities

Services & Capability

- Waste oil recovery & sale - We can generally recover tank bottom residues and offer them to the market as recovered fuel, displacing input cost and frequently off-setting all of our tank cleaning costs from the revenues earned.
- Mill Scale & Sludge Processing – to generate a product suitable for re-use or attracting lower disposal costs
- Oil / Water and Solid / Liquid Separation
- Oil & Chemical Spill and Environmental Incident Recovery – We have a proven track record of protecting our clients reputations and for assisting them with speedy recovery from spills and leaks
- Storage & Process tanks – cleaning, maintenance, repair & Up-grade - Chemical tanks included
- Heavy Fuel Oil Tank cleaning and management – We make a an often difficult, messy and un-pleasant job, quick, safe and efficient
- Hazardous & Non-Hazardous waste disposal - As a licenced waste broker we endeavour to secure lowest market rates at affordable rates of commission in order to deliver best value to our clients
- Specialised effluent treatment packages – displacing uplift, transport and off-site disposal costs by treating effluents at source using:
 - Cyclonic Evaporation Technology – evaporator based process water treatment
 - ICsep – micro-DAF technology to treat waste water streams
- Environmental remediation – We have the capability to manage and undertake the remediation and restoration of spill impacted soils and groundwater, post-spill or de-commissioning
