

Introducing Brain Associates Ltd

Incorporated in 1996, Brain associates Ltd provides a range of industrial services that combines technical skills and experience with ongoing in house effluent treatment equipment. We pride ourselves on delivery of projects that others decline, using innovative systems and technologies simplifying projects requirements and providing long term solutions.

The following information outlines our services and accreditation.

We are currently undertaking the following standards and look to have them in place by June 2015

- **ISO 9001**
- **ISO 14001**
- **OHAS 18001**

Utilising strategic partnership's we can provide the total solution for our clients from incident response through second stage contracting to waste disposal and long term solutions

Please find detailed below a sample list of past clients and services we provide:

Client List

- World Fuels
- Department For International Development
- BNFL
- Environment Agency
- UK Port Authorities
- Utility Companies Centrica, Welsh Water, Thames Water
- BP
- Shell
- Braemar Howells
- Tata Steel (Through Braemar Howells at present)
- Atkins
- Hastie Kirkpatrick International
- Jarron
- SLR Contracting
- Augean

Steel Industry Services & Equipment

- Waste oil recovery & sales (We have driven the development of the waste oil recovery and sales out of Port Talbot and Orb Steel since 2012)
- Mill Scale & Hot Mill Sludge Processing – to generate a product suitable for re-use in the furnaces
- Oil / Water and Solid / Liquid Separation equipment
- Spill and Environmental Incident Recovery - (We have a good recent example of our effectiveness on a substantial heavy fuel oil spill at Port Talbot)
- Storage/Process tank maintenance, repair & Up-grade (Chemical tanks included for energy)
- Heavy Fuel Oil Tank cleaning and management
- Haz & Non Haz waste disposal (As broker – we endeavour to secure lowest rates available in the market, and at low rates of commission in order to deliver best value to Tata)
- Specialised effluent treatment packages (As highlighted during our Presentation at the Tata Environment Hub Webinar)
- Environmental remediation – On many occasions we have undertaken environmental clean-up operations after fuel & chemical spills and currently provide long term management solutions for historical sites up and down the country.
- Cyclonic Evaporation Technology – Creating a neat waste from evaporation of waste process water
- ICsep – Using microbubble technology to treat waste water
- Creating PFO from waste oil & re manufacturing lube oils - This allows Tata Steel to reuse its waste oil streams negating the need to purchase virgin oil. The cost benefit could be **in excess of a million pounds per year.**

Additional Services

T: +44 (0) 1872 279 835
